PROFILE

I'm a student at the University of Utah studying computer science with an emphasis in game development and a minor in math. I'm passionate about sustainability, education, and human-centered computing. I have lots of experience tutoring students as well as creating software for various projects in research environments and in the industry. Being passionate about the things I put lots of effort into is very important to me, meaning I love working in environments that give me room to grow and make a difference.

WORK EXPERIENCE

Math Department Tutor / Grader

University of Utah Math Department   2024-Present

- Tutoring students with classes through Linear Algebra.
- Grading stats and probability evaluations.
- Getting grading done in a timely manner.
